

Connect Bricco to the electrical grid through the cable supplied in the packing to pay attention on the feed required from the machine.

We suggest ,for a correct cleaning, to wash the tap and the saucepan in the dishwasher (only for the model "ME"). Disassemble rotating in anti-clockwise direction (saucepan and/or tap) and assemble in a clockwise direction. Make sure that all components have been well tightened to avoid liquid leak, that could compromise the Bricco's working.

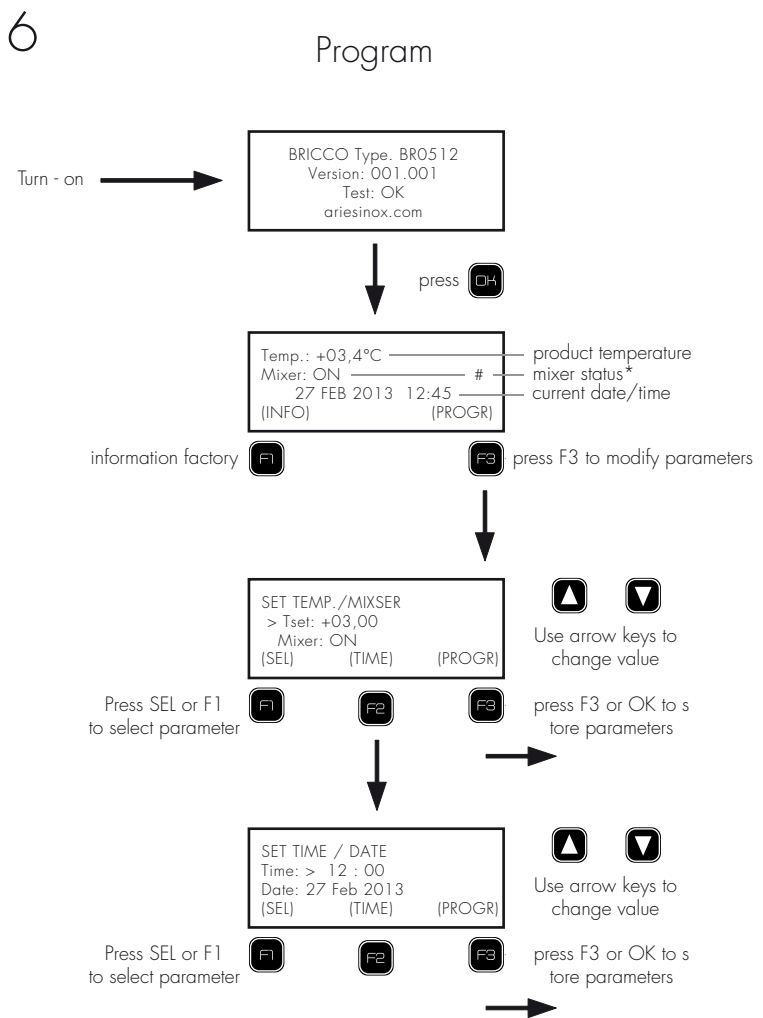

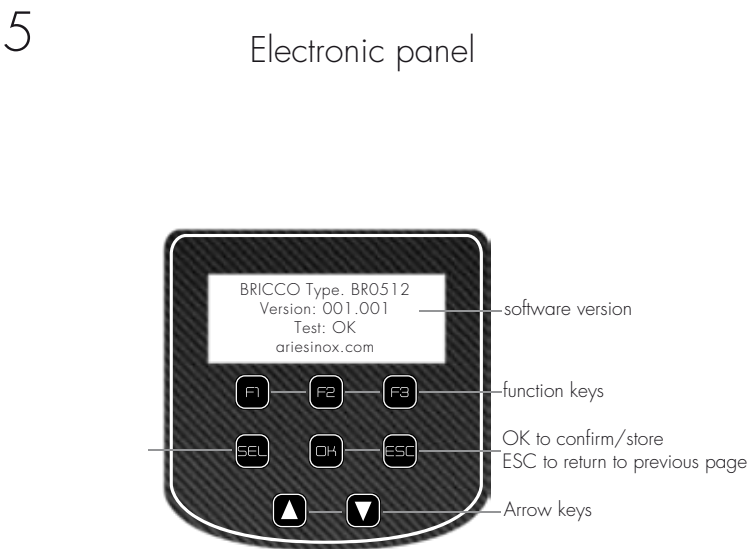

Install Bricco, for a correct working, to keep minimum distance indicated on the picture
